INDEX

Global Cybersecurity Index (GCI)

The Global Cybersecurity Index (GCI) measures how effectively countries protect against cyber threats. It evaluates their efforts in five key areas: legal frameworks, technology, organization, skills development, and international cooperation. This index helps compare cybersecurity readiness worldwide and highlights areas for improvement.

E-Government Development Index (EGDI)

The E-Government Development Index (EGDI) measures how well countries use digital technology to provide public services. It evaluates three areas: online services, telecommunications infrastructure, and human capital. This index helps compare e-government progress worldwide. It also highlights strengths and areas for improvement.
